**TO: His Excellency, Governor John C. West, Chairman, State
Budget and Control Board and the Members of the South
Carolina General Assembly**

The South Carolina Commission on Higher Education herewith respectfully submits for your consideration this Annual Report which briefly outlines the activities of the Commission and its staff. The Commission has carefully adhered to the new guidelines set down by the Budget and Control Board for annual reports, and believes that both narrative and statistics have been limited to that essential information which should be reported to you and preserved for a historical record.

Yours sincerely,

A handwritten signature in dark ink, reading "James R. Michael". The signature is written in a cursive style with a large, prominent "J" and "M".

**James R. Michael
Assistant Commissioner and
Supervisory Officer**

INTRODUCTION

The South Carolina Commission on Higher Education, established by Act Number 194 of the General Assembly in 1967, was created as the agency of State government specializing in higher education.

The Commission's primary concern is the strengthening of all the State's institutions of higher learning, to the end that quality education and training beyond high school may be available to every citizen who desires it and can be expected to profit from it. It is a coordinating body which must rely primarily on logical persuasion to gain cooperation and support.

The functions of the Commission are determined by the General Assembly and include the following:

1. *To make studies* regarding roles, operations, structure and external relations of South Carolina institutions of higher education.

2. *To submit recommendations* as may be desirable to the Budget and Control Board and General Assembly regarding policies, programs, curricula, facilities, administration and financing of the state-supported institutions of higher education.

3. *To review annual budgets* of the state-supported institutions of higher education and submit recommendations to the Budget and Control Board and the General Assembly. Capital budgets also are reviewed by the Commission.

4. *To approve all new programs* before they are undertaken by any state-supported institution of higher education unless approved by the General Assembly.

The activities outlined in this report are major, complex, and time consuming in nature, administered by a staff which is small in comparison to other states. In addition to the major functions mentioned above, the Commission staff answers inquiries from the State and nation on our institutions of higher learning, provides brief reports on higher education for members of the General Assembly and the Governor, and cooperates with other national and regional higher education agencies.

CHANGES IN COMMISSION STRUCTURE AND PERSONNEL . . .

During 1972, the General Assembly passed Act No. 1430 which amended the Commission's enabling legislation to provide that the number of members appointed by the governor will at all times exceed ex officio members by one. This gives the CHE a governing board consisting of nine (9) members appointed by the governor and eight (8) ex officio members.

Act 1430 also adds a new section (3.1) which creates, under the auspices of the Commission, an Advisory Council of Private College Presidents to counsel with and advise the Commission with regard to matters concerning nonpublic colleges and their role in overall programs of higher education in the state.

Since the publication of its last report, The Commission regretfully accepted the resignation of its chairman, Mr. E. Craig Wall. Dr. R. Cathcart Smith was appointed as Chairman, and Messrs. Gedney Howe and Othniel Wienges, Jr. were appointed as new members of the Commission by the Governor. On July 1, Mr. Y. W. Scarborough joined the Commission as an ex officio member, representing the new Board for Technical and Comprehensive Education.

There were also two important changes in the Commission staff during the year. Dr. James A. Morris resigned as Commissioner in August. A successor to Dr. Morris has not yet been named. The Commission welcomed Dr. W. Allen Smith as Assistant Commissioner for Health Affairs in mid-September. The newly created post is intended to strengthen the Commission's role in the design of educational response to the rapidly changing needs of the health care systems of South Carolina.

SUMMARY OF EXPENDITURES FOR 1971-72

The expenditures of the Commission on Higher Education are listed under two broad headings: Administration (operating expenses of the Commission) and Service Program (coordinated by the Commission). Special attention should be given to the fact that 79.9% of those funds expended for 1971-72 were of benefit to organizations other than the Commission. These funds should be considered flow-through funds inasmuch as they benefit the recipient rather than the CHE.

I. Administration (Operating Expenses of Commission)	
1. Personal Service (Salaries)	\$122,477
2. Operating Expense (Travel, Supplies, etc.)	54,457
TOTAL ADMINISTRATION	\$176,934
II. Service Programs (Coordinated by the Commission)	
1. Lander College	150,000
2. In-Service Teacher Training	100,000
3. Guaranteed Student Loan Program	100,000
4. S. C. Defense Scholarship Program	153,019
5. Regional Education Board—Scholarships	188,640
6. Regional Education Board—Administration	10,296
TOTAL SERVICE PROGRAMS	\$701,955
TOTAL—Commission on Higher Education	\$878,889

PROGRAM APPROVALS . . .

The CHE approved a total of 63 new programs during the twelve months ending October 31, 1972. More than half of these were associate degree (two-year) or diploma-certificate (one-year) programs submitted by the state's Technical Education Center system.

A list of the programs approved is given in the following table:

DOCTORATE PROGRAMS

Degree	Major	Institution
Ph.D.	Marine Science	USC
Ph.D.	Management Science	Clemson

MASTERS' AND FIRST PROFESSIONAL PROGRAMS

M.R.P.A.	Recreation and Park Administration	Clemson
M.A.T. ¹	Special Education	Citadel
M.S.	Marine Science	USC
M.B.A. ²	Business Administration	Citadel
M.Ed.	Rehabilitation Counselling	S. C. State
M.Lib.	Librarianship	USC
M.Ed. (& M.A.) ³	Early Childhood Education	USC
M.A.T.	Physical Education	Citadel

BACCALAUREATE PROGRAMS

B.F.A. ⁴	Art Education	USC
B.A.	Art Education	S. C. State
B.S.	Marine Science	USC
B.S.	Early Childhood Education	Francis Marion
B.A.	Sociology	Francis Marion
B.A.	Fine Arts	College of Charleston
B.S.	Physics	S. C. State
B.S. ⁵	Engineering Technology	S. C. State
B.S.	Education, Counselling and Guidance	S. C. State
B.G.S.	General Studies	USC
B.A. (minor)	Art	Francis Marion
B.S. (minor)	Environmental Science	Clemson
B.S. (minor)	Black Studies	S. C. State

A.A.S.	Fine Turf Management	Horry-Georgetown TEC
A.A.S.	Medical Laboratory Technician	Greenville TEC
A.A.S.	Medical Laboratory Technician	Tri-County TEC

1. Subject to transfer to Charleston Graduate Center if that is established.
2. Subject to certain limitations.
3. For main campus only.
4. Subject to certain limitations, but not to phasing out of B.A. in Art Education.

5. A transfer program enabling TEC-system graduates to enter four existing Engineering Technology degree programs as upper-division transfers.
6. Subject to the condition that no course offerings will duplicate those (e.g., in basic sciences) already offered at USC-Aiken.
7. Subject to approval of curriculum by USC School of Law.
8. Subject to withdrawal of A.D. programs in Secretarial Science and Commerce at USC-Aiken.

In addition, the Commission approved three innovative proposals from Francis Marion College which involve other public institutions. Approval was given of a joint program between Francis Marion and the Florence-Darlington Technical Education Center for four baccalaureate degree programs in Electro-mechanical Engineering Technology, Civil Engineering Technology, Electronic Engineering Technology and Industrial Engineering Technology.

Francis Marion and the University of South Carolina entered into an approved agreement whereby some graduate courses in education, for teachers, may be made available by U.S.C. on the Florence campus. This program is not yet eligible for degree status.

Francis Marion and the University of South Carolina also entered into an agreement providing that Francis Marion upper-division students choosing to major in six fields—accounting, anthropology, art, computer science, geography, and geology—which are not offered at Francis Marion, may take the prescribed advanced courses at the University of South Carolina. The Commission approved this arrangement subject to the understanding that it was not authorizing Francis Marion to develop baccalaureate degree programs in these areas itself.

The state gained its first formal cooperative work-study program for students in 1972-3 following CHE approval of a proposal submitted by Clemson University. The program provides alternating semesters of full-time study on campus and of full-time employment by a participating industry, business, or public agency. Work assignments are matched as closely as possible to the student's academic program. The Clemson program is available to any qualified Clemson student in its regular academic departments, and to graduate as well as to undergraduate students.

The Commission also approved The Citadel's proposal that students in the military college's evening program may no

longer be denied a baccalaureate degree if all or a substantial number of the credits ordinarily required are earned in the evening program.

ENROLLMENTS . . .

Full-time student enrollment at all South Carolina colleges and universities increased by 3.2% in fall, 1972, as compared to the previous year's totals. Enrollment in the public sector was up by 6.6%, to nearly 37,000 students, but the corresponding increase from 1970 to 1971 was 14%. Full-time enrollment in the private sector decreased by 2.5% to less than 21,000 students compared to an increase of about 2% by the previous year.

Fall full-time enrollment data for each campus are shown in Tables 1 and 2. It should be noted that all figures refer to students enrolled in programs chiefly creditable to a baccalaureate or higher degree.

A summary of fall full-time enrollments, by sector, is given in Table 3.

SOUTH CAROLINA HIGH SCHOOL GRADUATES AND COLLEGE FRESHMEN

(Source: Annual "College Freshman Report", State Department of Education)

Year of Graduation From High School	No. of Graduates	No. of Grads Admitted to Freshman Class	Ratio, Freshmen to Graduates (%)	Fraction of Freshmen Enrolling Out of State (%)
1961	22,040	7,335	30.5	18.4
1962	23,552	7,466	31.7	18.6
1963	24,220	7,446	30.7	17.9
1964	27,662	9,088	32.8	17.2
1965	33,192	10,780	32.5	17.0
1966	33,624	10,383	30.9	17.4
1967	34,026	10,766	31.6	18.4
1968	33,680	11,132	33.0	17.8
1969	35,309	11,537	32.7	19.9
1970	35,734	11,779	33.0	20.7
1971	35,553	12,079	34.0	19.6

The above Table shows, in the last column on the right, that the fraction of those going on to college who elect to go out of state has remained relatively constant, varying between a low of 17% and a high of 21% with no pronounced trend evident.

These data are obtained from annual surveys conducted of high school principals within the State. Not counted in the survey are those students who elect to attend technical education centers.

STUDENT FINANCIAL ASSISTANCE PROGRAMS . . .

The South Carolina Defense Scholarship Fund provides, for the state-supported institutions, matching funds required by three federally-assisted student loan programs: National Defense (now National Direct) Student Loans, Health Professions Students Loans and Nurse Training Loans. All three programs provide for direct loans to students by the institutions. Federal capital allocations are made directly to each institution with the Fund providing the required one-ninth institutional matching requirement. Fund activity for 1972-73 is summarized in the following table. The total state investment of \$164,658 represents an increase of about 7% over the comparable figure for 1971-72. Outstanding loans at the close of FY 1971-72 in all three programs exceeded 10,000, valued at nearly \$7.5 million.

The Statewide Guaranteed Loan Program enables the state to provide guarantees, against death or irrecoverable default, for loans made to needy students by commercial lenders. The guarantee is provided through agreement with United Student Aid Funds, Inc., a private non-profit agency which provides a capitalization ratio of 10:1 on state reserves deposited for this purpose.

In FY 1971-72, the 130 participating lenders in this program made 1,574 such guaranteed loans, totalling \$1.46 million to South Carolina college students. Since the program's inception in 1966, and through June 30, 1972, 9,131 loans, totalling \$6.24 million had been made. At the close of FY 1971-72, 6,123 loans valued at \$5.24 million were outstanding.

State investment in the program in FY 71-72 was \$100,000, bringing total state funds invested in the program to \$275,000. Initial federal seed grants to the state in 1966-67 for initiation of this program were \$292,000.

Direct state gift assistance in the form of grants to 251 state residents who elected to go out of state for certain curricula was provided through programs operated by the State Board of Control of the Southern Regional Education Board (see Table). Forty-nine students enrolled in one of four contract programs through the Southern Regional Education Board. Another 202 students were awarded State grants through the local Board for study out of state in other curricula.

SUMMARY OF AID AWARDS, FY 1971-72, OF SOUTH CAROLINA BOARD OF CONTROL OF SOUTHERN REGIONAL EDUCATION BOARD

Contract Awards	No. Students	Amount
Dentistry	4	\$ 7,200.00
Veterinary Medicine	40	72,000.00
Occupational Therapy	2	1,000.00
Library Science	3	1,483.35
Subtotal	49	81,683.35
Non-Contract Awards	202	63,957.00
TOTAL	251	\$145,640.35

STUDENT INTERN PROGRAM . . .

During the summer of 1971, the CHE, with partial funding by the Southern Regional Education Board, sponsored for the first time the Student Intern Program of South Carolina. Forty undergraduate and graduate students were employed throughout the State in agencies of State and local government. This program originated from a similar program both financed and conducted by the Southern Regional Education Board during the summers of 1969 and 1970.

The intern program, designed to utilize qualified college and university students on specific projects of importance in State and local government, intended to provide financial support to the students as well as a meaningful learning experience. The Commission believes the program serves the purpose of providing relevant, meaningful educational experience for students while affording them opportunities for service and a valuable insight into career fields. Organizations are provided with temporary qualified manpower and a source of recruitment for permanent staff needs.

In 1972, the Southern Regional Education Board discontinued its funding of the internship program, and attempts to obtain financial support from the General Assembly were unsuccessful causing the program to be temporarily discontinued. The CHE felt that, after evaluating the intern program, the program must have limited funds to subsidize the interns, agencies employing interns, and faculty counselors.

The Commission has requested, in its 1973-74 budget, \$25,000 for the intern program as well as funds necessary to employ a Director of Student Affairs. This director will administer the intern program, financial aid program and other student programs in the State.

IN-SERVICE TEACHER TRAINING . . .

The Commission on Higher Education continues to work with the State Department of Education and the colleges and universities to evolve a workable program of in-service training for public elementary and secondary teachers. Over the past three years, approximately 1,700 teachers or supervisors from throughout the State have had the opportunity to upgrade their skills in critical areas of need.

During the 1971-72 school year, the colleges and universities submitted twelve (12) proposals totalling \$198,419. These proposals were evaluated by the State Department and final evaluation and approval were given by the CHE to six (6) projects totaling \$100,000. Due to the fact that the 71-72 appropriation was reduced from \$200,000 to \$100,000, the in-service training funds were used to assist in upgrading local district supervisory personnel rather than the classroom teachers in the areas of reading and mathematics.

Even though the "supervisory" approach has worked quite well, the State Department of Education and the Commission on Higher Education agreed that the funds of \$100,000 appropriated for in-service teacher training for 1972-73 should be used to assist public elementary and secondary teachers in the areas of reading and mathematics. Grant applications have been forwarded to each college and university in the State with an invitation to each to participate in this program.

A summary of projects approved for 1971-72 is listed below.

APPROVED IN-SERVICE PROJECTS FOR 1971-72

Responsible Institution	Field	Number of Supervisors	Amount Funded
Clemson	Mathematics	30	\$ 18,894
Furman	Reading	15	8,000
S. C. State	Reading	20	11,454
U.S.C.	Mathematics	30	16,305
U.S.C.	Reading	15	17,572
Winthrop	Reading & Mathematics	30	27,775
TOTAL		140	\$100,000

OFF CAMPUS GRADUATE EDUCATION FOR TEACHERS . . .

In the Spring of 1972, the Commission became aware of competition and what appeared to be unnecessary duplication between those colleges and universities that were involved in off-campus graduate education for teachers. Just as important, certain sparsely populated areas in the state were receiving relatively little attention, despite the needs of teachers in these areas to obtain graduate work in education. Thus, in May of the year the Commission appointed a special committee to examine this problem. The committee was asked to look at those plans which had already been made or were being formulated for 1972-73, and to recommend adjustments which

they felt to be appropriate. Second, the committee was asked to prepare a long-range plan for the state for coordinating this important aspect of continuing education in the future.

It was evident from the discussions that an increased sensitivity was developed between the several institutions with regard to duplication of courses and programs. The committee quickly developed a short-term plan for 1972-73 which minimized unnecessary duplication at the same time that it protected contracts which had already been made between school districts and institutions. Since the completion of the short-term plan, the committee has appointed three sub-committees to help in the development of a proposal for long-range cooperation. The committee feels that it is imperative to determine the needs of South Carolina's teachers for graduate education as specifically as possible. The committee further feels that it should examine the potential use of the media as an instrument of meeting these needs, and that pilot ETV programs should be developed, used, and evaluated as part of this examination. It is expected that the committee's final report, which should be ready in the spring of 1973, will recommend the degree to which specific alternatives will be useful in bringing graduate education to a maximum number of the state's teachers.

HIGHER EDUCATION MANAGEMENT INFORMATION SYSTEM . . .

In early 1969 the CHE and the public colleges and universities agreed on the need for a statewide system of uniform data identification and collection, reporting, budgeting and planning. The five major categories, or files, of data to be established were students, faculty and staff, facilities, courses and finance. Responsibility for active development of the system was assigned by the Policy Committee (Presidents of the public higher learning institutions and the CHE Commissioner, chairman) to a Working Committee composed of the vice presidents for academic and business affairs, and other key executives such as registrars and institutional research directors, of the public colleges and universities under the chairmanship of the Assistant Commissioner for Financial Affairs.

The management information system for South Carolina higher education became operative in 1970. Commencing with data for the fall semester of 1969-70, the public colleges and universities and the CHE began to receive and use accurate, meaningful, comparable reports on students, faculty and other essentials. By mid-1971 the first phase of the management information system was essentially complete. Manually prepared reports on actual data, by then covering two academic years, became available to the colleges and universities and to the CHE for study and analysis, including comparisons with similar information from other states to the extent obtainable. This included, for the first time, comparable data on revenues by source and expenditures by function. And, following agreement on uniform classifications and codes for physical facilities, reporting of meaningful space analyses commenced in late 1971. Analyses of non-teaching staff and student fees began in 1972, covering academic year 1971-72.

Appendices E through Y contain some summaries and analyses of data contained in recent CHE reports by the public colleges and universities. Coverage includes student characteristics and full-time equivalent (FTE) enrollments by level, FTE teaching faculty by rank, semester credit hour production per FTE teaching faculty member, semester hour and contact hour comparisons, student/faculty ratios, average weekly teaching hours, average class sizes, average faculty salaries by rank, revenues by source, expenditures by function, non-teaching staff, student fees, etc. Such information could not have been obtained on a reliable basis heretofore.

The second phase of management information system development requires computerization. CHE is seeking funding, and a specialist experienced in computerized higher education information systems, for this purpose. Success in these efforts will enable CHE to receive uniform data from the colleges and universities on magnetic tapes or other computer input rather than by manually prepared reports. Programs can be purchased or designed so as to produce for the CHE the reports it needs (with copies, if desired, for the institutions). Numerous detailed studies and analyses, which are currently impractical from both preparation and utilization standpoints, will become valuable tools for improvement of higher education. It will also become feasible to use computerized data in the prep-

aration of detailed budgets and long range plans; selection of preferred courses of action can be made from arrays of possibilities. The CHE's computerized information systems specialist will, in addition, be available to assist the colleges and universities, particularly the newer ones (and with emphasis on cooperative efforts) in improving their own data processing and information utilization.

STATE APPROPRIATIONS FOR COLLEGES AND UNIVERSITIES . . .

The Commission on Higher Education reviewed 1973-74 appropriation requests aggregating \$109,540,199 from nine college and universities, including Lander (which is to become a state college by next July 1) and the Medical University's hospital and clinics. These requests, if granted, would represent an increase of \$22,757,487 or 26.2% over 1972-73. Excluding the Medical University, increases of \$17,351,032 or 26.8% (\$16,058,743 or 24.8% without Lander) are requested by the institutions; these work out to an average appropriation of \$1,800 for the 45,666 FTE students which they project for the fall of 1973.

In line with the 1972 General Assembly's mandate, and with prior agreement of the Presidents, the Commission's review placed primary emphasis on appropriation requests as computed by formula. An appropriation formula has been under joint development by the colleges and universities and the Commission for approximately two years. The 1973-74 version, which was adopted unanimously by the Commission on July 16, 1972, is not considered to be a perfect instrument. Steps to produce an improved formula for 1974-75 are already being taken. Nevertheless, the Commission considers the 1973-74 Appropriation Formula (see Appendix D) a major step in the direction of increased objectivity and inter-institutional equity. The college and university presidents agreed on July 16 to support use of the formula for 1973-74.

In making its 1973-74 appropriation recommendations to the Budget and Control Board and to the General Assembly, the Commission followed the policy of "phasing in" the formula. Three principles were adopted:

1. Recommend an increase of 5% over the 1972-73 appro-

priation, thereby recognizing a degree of inflation, even if the formula produces a smaller or no increase.

2. If the formula produces an increase of more than 5%, generally recommend 80% of the increase. (Several specific items were recommended for full funding on an exception basis.)
3. Recommend no more than the amount requested by the institution, even if the formula produces a larger amount.

Amounts recommended by the commission, determined as above for all institutions except the Medical University (for which a formula has not yet been developed), are the following:

	Recommended 1973-74 Appropriation	Increases Over 1972-73	%	Per FTE Student
Winthrop	\$ 5,460,934	\$ 673,362	14.1	\$1,498
Citadel	4,626,082	220,290	5.0	1,713
S. C. State	5,538,334	252,178	5.0	2,047(1)
College of Charleston	3,731,882	547,028	17.2	1,523(2)
Francis Marion	2,456,571	469,481	23.6	1,535(3)
Lander	1,292,310	1,292,310	-	1,292
U.S.C.—Main Campus	32,603,181	6,108,464	23.1	1,869
Clemson—Main Campus	18,532,124(4)	2,573,217	16.1	1,973
U.S.C. Regional Campuses	2,688,000	280,800	11.7	600
Clemson Regional Campuses**	148,800	-177,600	-54.4	600
Total (Excl. Medical Univ.)	77,078,218	12,239,530*	18.9*	\$1,688
Medical University	27,350,458	5,406,436	24.7	
Total	\$104,428,676	\$17,645,966	20.3	

Notes: (1) \$1,958 per FTE excluding Felton Laboratory School.

(2) Plus retained tuition of \$313,750 (\$128 per FTE).

(3) Plus retained tuition of \$324,500 (\$203 per FTE).

(4) Includes \$274,400 for animal husbandry, subject to Commission approval of a new program.

* \$10,947,220 or 16.9% increase excluding Lander.

** Clemson's regional campus at Greenville will be absorbed by Greenville TEC on July 1, 1973.

SPACE INVENTORY AND UTILIZATION STANDARDS ...

During the fall of 1971 the Commission on Higher Education completed a space inventory of the physical facilities of the state's postsecondary educational institutions. The results of the inventory, which were published in a report in June of 1972, indicated that the physical facilities of the state's higher educational institutions included 16.3 million square

feet of usable space, an average of 229.3 square feet per full time equivalent student, including 81.3 square feet in residential accommodations. Sixty one and nine tenths percent of the space and 67.8 percent of the FTE enrollment were in 30 public institutions, including the universities, their centers and branches, the colleges, and the technical education centers. The balance was in 26 non-public four- and two-year institutions.

Clemson University and the University of South Carolina had 33.9 percent of the FTE enrollment and 29.6 percent of the non-residential space. Twenty non-public four-year colleges had 27.0 percent of the FTE and 30.5 percent of the non-residential space. The non-residential space per FTE by institutional grouping is as follows: nine university branches and centers, 66.7 sq. ft.; six non-public two-year, 102.6; thirteen technical education centers, 125.1; two universities 127.2; five public four-year, 164.2; twenty non-public four-year, 164.6; the Medical University, 453.8.

The report, *Space Inventory, South Carolina Post-Secondary Institutions, Fall 1971*, was prepared from reports submitted by each institution as part of the Higher Education General Information Survey conducted annually by the U. S. Office of Education.

Following the completion of the inventory, the Commission established utilization standards for classrooms and class laboratories. Although these two facilities combined comprise less than 20 percent of total space in any of the state-supported institutions, they are obviously important to the mission of each institution.

Three measures of utilization were considered.

1. The assignable square feet (ASF) per classroom station. This in effect is the total space necessary to accommodate one person for one classroom period. Similar measures for class laboratories' stations were not considered practical since there is such wide variance among disciplines.

2. The percentage of available hours a classroom or class laboratory is utilized for scheduled instruction.

3. The percentage of available student stations occupied when a classroom or class laboratory is utilized for scheduled instruction.

SUGGESTED UTILIZATION STANDARDS

	Classrooms	Class Laboratories
Size per station, including service area	15 ASF—Desirable	Wide Variance
Room Utilization	17 ASF—Acceptable	
Station Occupancy	70%—Desirable	50%—Desirable
	60%—Acceptable	40%—Acceptable
	65%—Desirable	80%—Desirable
	55%—Acceptable	70%—Acceptable

Acceptable standards may apply to existing facilities. Before considering construction of new facilities, attainment of desirable standards should be demonstrated or projected, or exceptions justified.

Each institution also instituted procedures to measure actual utilization of classrooms and class laboratories. Trial reports suggest the data produced will be useful, and when procedures are finalized, the data reported will provide a valuable management tool for the institutions and the Commission.

COMPUTER ADVISORY COMMITTEE . . .

The Computer Advisory Committee, conceived and sponsored by CHE, had its first meeting in late 1969. The Committee's makeup is primarily the computer center directors of the eight public colleges and universities, chaired by the Assistant Commissioner for Financial Affairs. Its adopted charter is reproduced in full, as follows:

The Computer Advisory Committee is organized within the Commission on Higher Education to foster the growth of computer usage in higher education, both public and private, in South Carolina. The Committee is a coordinating, rather than a controlling, agency for computer usage, functioning primarily as a body to improve communications among the State's universities and colleges. In particular, it is to (1) provide a forum for regular discussion of mutual problems, (2) communicate the needs of institutions to the Commission and advise the Commission on all computer-related matters, (3) review institutional plans for acquisition of computer hardware and software, and (4) encourage mutual cooperation among institutions in such areas as development of compatible programs and data formats, coordination of long-range plans, and study of joint computer facilities and systems.

The Computer Advisory Committee holds regular meetings, rotating among the eight institutions so as to observe compu-

ter developments on the spot. It continually invites to its meetings the Director of the State Division of Technology Utilization so as to maximize collaboration and minimize duplication of effort. In 1972 the Committee also issued a standing invitation to a representative of the South Carolina private colleges; he attends regularly, to the advantage of the public as well as the private institutions.

Deliberation of the Computer Advisory Committee have substantially contributed to the effective and economical improvement of computer utilization at the colleges and universities. For example, the Committee in its early days recommended enlargement of the Medical University's computer through purchase of Clemson equipment about to be replaced, thereby saving from \$50,000 to \$125,00 a year. A sizable further expansion of the Medical University's memory capacity has recently been recommended. During late 1971 and 1972 acquisitions of large computers by the University of South Carolina and Clemson University were studied and recommended. Winthrop, under Committee concurrence, has leased a small additional computer pending determination of how best to provide for their growing academic computing needs. College of Charleston computing requirements are currently being served by the Medical University; expansion of this relationship is under study. The Citadel is also investigating the feasibility of replacing its two small computers with terminals served by U.S.C. Meeting the future computing needs of Francis Marion and Lander College is under study, with special emphasis on terminals to the large university computers.

The outlines of a state higher education computer network are clearly foreseen. If and when such a network eventuates, the Computer Advisory Committee will have been the motivating force which made it possible.

STATEWIDE NURSING COMMITTEE . . .

In 1971, the Commission on Higher Education met with members of the S. C. Nurses' Association, the State Board of Nursing, and the S. C. League for Nursing and agreed that a Statewide Master Planning Committee on Nursing Education should be established under the auspices of the Commission on Higher Education. It was also agreed that this Committee be

an interdisciplinary body including persons from nursing practice and education, physicians, health specialists, higher education authorities, and members of the public at large.

Those organizations which are represented, along with the number of Committee members which they have nominated, are as follows:

South Carolina Nurses' Association	11
South Carolina Medical Association	1
Comprehensive Health Care Planning Advisory Council	1
South Carolina Hospital Association	1
South Carolina State Department of Education	1
South Carolina Commission on Higher Education	1
Student Nurses' Association of South Carolina	1
South Carolina League for Nursing (Public at large)	3
State Board for Technical & Comprehensive Education	1
Total Number Committee Members	21

After several months of getting organized, developing rules and procedures, and electing officers, the Committee began its work by gathering statistics, discussing goals and objectives and developing specific plans of action. Out of this study came the general idea that the main function of the Committee is to develop a "blue-print" for nursing education in South Carolina.

In May, 1972, the Committee recommended that a joint statement from the CHE and the State Board of Nursing be developed which would provide a system of approving new nursing programs. The first paragraph of this statement reads as follows:

"The State Board of Nursing for South Carolina and the S. C. Commission on Higher Education have agreed that new nursing programs (practical, associate degree, diploma, and baccalaureate), initiated by any institution (public or private) involved or planning to become involved in the education of nurses, will be considered for approval *only* after the review of the Statewide Master Planning Committee on Nursing Education."

The CHE staff is to act as the secretariat for the Committee and the State Board. Therefore, any institution which desires to establish a new nursing program is to submit to the Commission the following information:

1. type of program;
2. educational facilities, including libraries;
3. clinical facilities for appropriate learning experiences;
4. evidence of community and state need and support;
5. identification of community to be served;
6. student pool for current and future enrollment and continued placement opportunities for graduates;
7. estimated student enrollment by year for the next three years;
8. current faculty available for program (number, highest degree earned) and plans for adequate supply of qualified faculty;
9. evidence of long term fiscal responsibility;
10. proposed date of establishment; and
11. estimated total cost of program and source of funding (attach budget).

While the review of these criteria by the Statewide Master Planning Committee on Nursing Education will be considered a prerequisite to action taken by the State Board and the Commission, it does not replace the existing approval requirements outlined in Regulation No. 22 of the Laws Governing Nursing in South Carolina and/or the procedure of approval for new programs of the Commission on Higher Education.

In order to develop standards, guidelines and other regulations for nursing education, the Statewide Master Planning Committee has established four (4) sub-committees. The reports of these sub-committees will be formulated into a report which should be available by February, 1973.

MEDICAL EDUCATION . . .

In January, the Commission submitted a report to the Governor and General Assembly, *Medical Education in South Carolina*, which primarily considered the need for a second medical school, but which included much factual data relating to health care. The report in essence pointed out measures proposed and underway to strengthen medical education and concluded that only after these measures were operable and had been evaluated could a decision be made on a second medical school.

In February, the General Assembly determined that further investigation was desirable and by Concurrent Resolution appointed a Health Care Study Committee, including six members of the General Assembly and three from the Commission on Higher Education. The Health Care Study Committee report is to be submitted prior to January 1, 1973, or as soon thereafter as practicable.

TWO-YEAR POST-SECONDARY EDUCATION . . .

In December of 1971 the South Carolina Commission on Higher Education and the State Committee for Technical Education issued a joint report which recommended a plan to meet the needs of the state in two-year post high school education. Reacting to this plan, the state legislature passed Act 1268 which created the new State Board for Technical and Comprehensive Education and repealed sections of the Code of Laws of South Carolina, 1962, relating to the Advisory Committee on Technical Training. The intent of the Act, as finally approved, is to give jurisdiction to this new board over all two-year state-supported post-secondary institutions and the programs that are presently operating, and over any created in the future. The branches and centers of the University of South Carolina and Clemson are exempted from this Legislation.

Two-year institutions may meet the changing educational needs of their service area by 1) adding the first year and second year college parallel curricula to technical education centers; 2) merging two or more two-year institutions; or 3) enabling university branches and centers to become comprehensive institutions under the direction of the State Board for Technical and Comprehensive Education.

All associate degree programs are to be approved by the Commission on Higher Education, and admissions criteria for the college parallel program are to be established with the concurrence of the Commission.

The Board is to maintain coordination with the Commission by presenting to the Commission its plans, programs, and academic educational budgets. The chairman of this new Board will be an ex officio member of the Commission on Higher Education.

In addition to assisting in the development of the new legislation providing for comprehensive two-year institutions, the Commission approved a recommendation of one of its ad hoc committees that encouraged greater articulation between technical education centers and colleges and universities. Specifically, the Commission urged four-year public institutions to implement new policies which would provide for wider acceptance of transfer credit from degree programs in technical education centers. Follow-up data which were collected during the fall of 1972 indicate that a great deal of progress was made towards full implementation of this recommendation.

OTHER LEGISLATION AFFECTING HIGHER EDUCATION, 1972 . . .

Winthrop College

Act No. 1206, relating to the conferring of degrees by Winthrop College, amends Section 22-412, Code of Laws of S. C., 1962. This Act provides for the conferring of degrees to male students who are legal residents of the state and who do not live on the campus. No male student, however, will be allowed to enroll at Winthrop who has not completed at least two years of college except at summer school sessions, at which students of any class may enroll.

A referendum will be conducted at the same time as the general election in November, 1976, in order that the people of South Carolina may decide if Winthrop is to remain an institution for female students only.

Medical Scholarships

House Bill No. 3353, A Concurrent Resolution, requests Governor John C. West to take such action as he deems necessary to enable students of South Carolina to seek degrees in Veterinary medicine at out of state institutions.

Note: Several Bills were introduced in the House which would have established "scholarships" for students of medicine and dentistry. These Bills, however, were referred to committees and were not reported out.

Free Tuition

Act No. 1015, relating to certain Veterans' children, amends Section 22-56, Code of Laws of S. C., 1962. This Act permits

children of Vietnam Veterans, who are missing in action or prisoners of war, to enroll in any state-supported college or university free of tuition.

Sectarian Institutions

Senate Bill S-598 proposes an amendment to Article XI of the Constitution of South Carolina, 1895. A provision in this amendment would remove the prohibition against indirect aid to sectarian institutions in order that grants and other forms of state assisted student aid may be initiated.

Governance

Act No. 1211 adds a new section (11-1.1) to the Code of Laws of South Carolina, 1962. This Act provides that the president of the student body at each state-supported institution of higher learning *may* be an ex officio non-voting member of the Board of Trustees of the institution he attends and represents.

Note: Several Bills, which would have changed the membership of the governing bodies of the state-supported institutions of higher learning, were introduced but remained in education committees.

Three Year Bachelor's Degree

House Bill H-2853, a concurrent resolution, requested the Commission on Higher Education to plan and institute a pilot program for three (3) year bachelor's degrees in state-supported institutions of higher learning.

Lander College

Act No. 1393 authorizes the transfer of Lander College to the State of South Carolina. Lander, a four-year liberal arts school located in Greenwood, is currently supported largely by the residents of the county. On July 1, 1973, Lander will officially come under the State College Board of Trustees which was created to administer the program of the College of Charleston and Francis Marion College. This gives the state nine (9) state-supported institutions of higher learning.

COMMISSION PUBLICATIONS . . .

In addition to its newsletter, the Commission on Higher Education has published the following documents since October 31, 1971:

- | | |
|----------------|---|
| December, 1971 | <i>Two-Year Post-Secondary Education in South Carolina, A Joint Report of the South Carolina Commission on Higher Education and the State Committee for Technical Education</i> |

TOTAL	1,182	1,449	2,631

APPENDIX D

SOUTH CAROLINA COMMISSION ON HIGHER EDUCATION 1973-74 APPROPRIATION FORMULA

for **equitable sharing** of state taxpayer support for South Carolina's public colleges and universities. Realistic **lump-sum** appropriations are computed **impartially** by using **actual** enrollments, proven student/faculty ratios, **uniform** salary assumptions, and justifiable **average** percentages to cover the agreed functions of the institutions.

1. Project Main Campus Student Credit Hour Production (by level of instruction and academic area) for the fall 1973 semester. (See CHE Report 14)
2. Divide undergraduate credit hours by _____ 15
 professional (law) credit hours by _____ 15
 master's level credit hours by _____ 9
 and doctoral credit hours by _____ 6
to determine the number of FTE students to be taught. (See CHE Report 3)
3. Divide the number of FTE students at each level and in each academic area by an appropriate student/faculty ratio (see attachment) in order to find the number of FTE **teaching** faculty positions required. Ratios for remedial instruction may be based on own experience (and should be indicated by footnote).
4. Of the total number of FTE teaching faculty positions required, determine the proportion to be filled by teaching assistants. (Use the proportion shown on fall 1971 CHE Report 9, unless justification for a different proportion is presented). Multiply the number of FTE teaching assistants required by \$4,540 + 9.2% (Clemson's fall 1971 average FTE teaching assistant salary plus 5.5% and 3.5% annual improvement).
5. Multiply the remaining number of FTE teaching faculty positions required by \$13,641 + 9.2% (Clemson's fall 1971 9-month basis average salary for all teaching faculty except student assistants, plus 5.5% and 3.5% annual improvements) for the two universities, and by \$12,680 + 9.2% (Citadel's fall 1971 average plus 5.5% and 3.5% annual improvement) for the five colleges in order to obtain total teaching salary requirements. (See CHE Report 10)
6. For the two universities add 50% and for the five colleges add 40% of total teaching salary requirements to provide for other instruction and departmental research expenses (or faculty support.) This is to cover deans, department heads, secretaries and clerks, laboratory assistants, supplies, equipment, travel, telephone, etc. **Faculty salaries plus faculty support equals the proposed Instruction and Departmental Research budget.**
7. (Exclude all expenditures for Sponsored Research and Other Sponsored Programs, since these are not considered for state appropriations.)

8. Under the caption Other Separately Budgeted Research add amounts requested for research and for operation of special bureaus and institutes. These should normally be limited to amounts appropriated in 1972-73 for research and for operation of such bureaus and institutes plus 4%, modified for any significant change in circumstances.
9. Add 2% of the Instruction and Departmental Research budget for Extension and Public Service expenditures.
10. All 10% of the I & DR budget to cover Libraries, including acquisitions and operations.
11. Add the average of three years' (1969-70, 1970-71 and 1971-72) actual expenditures for Operation and Maintenance of Physical Plant plus 4% per year (12.5% for three years.) If during 1972-73 or 1973-74 the gross square footage of buildings increases at a faster rate than FTE student enrollments, add such incremental percentage to that year's 4% allowance for general cost increases. Total allowable expenditures for Operation and Maintenance of Physical Plant may not exceed 36% of the I & DR budget.
12. Add 24% of the I & DR budget to cover General Administration, Student Services, General Institutional Expense, and Organized Activities Related to Educational Departments.
13. From the total amount computed in paragraphs 1 through 12 subtract anticipated student fee income (other than for debt service), the excess of summer school revenue over summer school expenditures, miscellaneous revenue from sales and services, and any amounts of federal, county or municipal revenues expected to be received in support of current educational and general expenditures. The balance represents the amount of the requested state appropriation for main campus operations, subject to adjustment for actual fall 1972 enrollments.
14. U.S.C. and Clemson should also request a state appropriation of \$600 for each FTE student (determined by dividing projected semester credit hours by 15) expected to be enrolled at regional campuses, subject to adjustment for actual fall 1973 enrollments.
15. Special funding may be requested for starting up new colleges and programs approved by the Commission on Higher Education, bringing a library collection up to minimum standards, etc. Special funding may also be requested for the incremental costs of continuing programs which are particularly expensive but are, in the Commission's view, nevertheless necessary. These should be listed (and justified) individually, and then added to the amount determined under paragraph 13 (or 14).

STUDENT/FACULTY RATIOS FOR USE WITH 1973-74 APPROPRIATION FORMULA
